Global Humanitarian Crisis Prevention and
Response UNIT
&
The Legacy National Security Advisory Group
(US) – LNSAG
&
The Stand Up America US Foundation

PIA Calls for an Urgent Ceasefire in Ukraine

A joint meeting was held in the United States on August 22, 2023, to discuss a path to a ceasefire summit conference to end hostilities in the Ukraine–Russia conflict. A tentative meeting is scheduled in the Bahamas in early January 2024.

The meeting was between the Stand-Up America US Foundation, the Legacy National Security Advisory Group (LNSAG-US), Alliance members, and the Global Humanitarian Crisis Prevention and Response UNIT (UK). PIA is a coalition of non-governmental organizations and NGOs taking a neutral position in the conflict. The continuing escalation must stop to prevent further loss of life destruction and avert worldwide catastrophe.

The meeting’s mission was to set forth a plan for Russia and Ukraine to agree to a ceasefire and establish a basis for future negotiations. While the two sides, for now, may still be far apart, the scope for peace rests heavily on a third-party intervention.

The war in Ukraine is being overtly encouraged by NATO members under the flagship of the United States of America and Great Britain. Notably, there is a complete absence of efforts from within NATO to promote meaningful dialogue between Russia and Ukraine.

However, such a state of affairs reflects only some Western European members' sentiments. Factions are firmly in opposition to the current actions of those in power.

LNSAG and UNIT formally launched the Patriot’s International Alliance (PIA) as a platform for patriots worldwide to call for the cessation of the war in Ukraine. Raising unified voices of opposition from within NATO is the first step toward a hopefully peaceful resolution to the conflict.

The PIA is planning a virtual planning conference in late September 2023. We will seek influential country delegates to participate. It will be essential that US, Ukrainian, Russian, and Chinese diplomats participate and come together to seek a strategic path to a ceasefire. The aforementioned ceasefire conference in the Bahamas will be earl 2024 We request that interested country

representatives and delegates notify PIA of their desire to attend, representing their countries.

Objectives are:

1. Complete withdrawal of troops on Russia's border.
2. Cease deliveries of all arms shipments, including fighter aircraft.
3. Cease all training of Ukraine forces by the West.
4. Continue all required humanitarian aid to Ukraine.
5. Have peacekeepers from non-aligned countries maintain buffer zones.
6. Russia will immediately halt all further advances in Ukraine.
7. There will be a prisoner exchange in a monitored environment.
8. Discuss the rebuilding of Ukraine and refugee resettlement.

We do not take sides in this conflict but seek truth, stability, and peace. If the West does not want peace, what do they want? What does the West hope to accomplish by gathering troops along Russia's border? Russia has assured the West they have no interest in lands west of Ukraine, but they will defend their borders with everything at their disposal. They have done it before.

Observations of the current environment:

- Western nations appear unmotivated to bring about peace in Ukraine.
- The West has distorted the actual situation and continues misinforming the public regarding their endgame. The West refuses to see Russia's position in this war.
- Poland has designs on western Ukraine and lands that now constitute present-day Belarus and Western Ukraine.
- It is apparent Ukraine's so-called counter-offensive has ground to a halt. Further hostilities are bringing on a humanitarian crisis and near-total destruction of the country.
- Ukraine and the West portray Ukraine with a formidable standing army. They have weakened force despite all the financial and military weapons and ammunition supplies.
- They pretend that Russia is barely hanging on themselves...untrue. Russia waits for Ukraine to show some semblance of common sense.
- The Biden Administration and NATO continually talk of democracy and the security of Europe when they are interested in neither. They want to

diminish Russia as a military power and remove Putin as a punishment for not going along with the New World Order.

- Old Soviet satellite countries smell blood in the water and want revenge for Soviet atrocities from a nation that no longer exists, while others like Denmark want revenge for wars as far back as the Napoleonic Wars.
- The World Economic Forum, The UN, The IMF, and other globalist 'stakeholders' are calling the shots. They want to diminish the militaries of the United States, NATO, and Russia to hasten their global coup, The New World Order.
- Acting Deputy Secretary of State Victoria "Torie" Nuland is using the conflict to resurrect what appears to be an old family feud. Her father emigrated from Tzarist Russia, which is now Ukraine. Nuland has a genuine personal animosity toward Russia. We need to announce loud and clear that we do not need to resurrect ancient history and resume those old conflicts or personal family feuds in the 21st century.

Resolutions set forth by the PIA are as follows:

1. Cease all forms of support (Military and Intelligence) to Ukraine immediately.
2. Promptly recall all US and UK nationals serving in any form in the territories of Ukraine.
3. Cease all Armed Forces of Ukraine (AFU) personnel training by the United States of America and Great Britain.
4. Initiate **unconditional** ceasefire talks between the Russian Federation and Ukraine through-
 - a. International Recognition of the grievances of the Russian Federation on the grounds of –
 - i. Crimes committed against humanity in Donbas by the Armed Forces of Ukraine and other related agencies during the last decade.
 - ii. The installation of the US Department of Defence and its affiliated bioweapons laboratories in Ukraine as a threat to the national security of the Russian Federation.
 - iii. Active intervention by the US and other NATO states in the internal politics of Ukraine to promote anti-Russian sentiments.

- b. Encouraging Ukraine to seek peaceful compromise with the Russian Federation to promote regional security.
